

We Have Sold Out; We Are Closing Out.

We have sold this business and will turn it over to another party about January 1. In the mean time we shall reduce the stock all possible by reducing prices to the lowest possible basis that will mean ANY profit to us. Following are a few of the bargains we are offering:

- \$122. Owensboro Wagons for \$105.
- \$225 Golden Throat d Graphophone, \$185
- \$150. Golden Throat d Graphophone, \$120.
- \$68.50 Cast Iron Range for \$60.
- \$3.00 Axes for \$2.70.
- \$8.50 Crosscut Saws \$7.00.
- \$1.85 Trace Chains, extra Heavy, \$1.55.
- \$1.50 Trace Chains, Medium weight, \$1.25.

The above are only a few of the bargains we are offering for every thing in our store will go at reduced prices. Get our prices before you buy.

CROSSVILLE HARDWARE COMPANY

J. F. WYATT LOSES BARN

Chattanooga Hounds Follow Trail to Annis Myers' Home

Sunday night at twelve o'clock J. F. Wyatt, who lives near Vandever, 11 miles south of Crossville, discovered his barn was on fire. By prompt and energetic action he saved his two horses and a small amount of corn, everything else was destroyed.

Mr. Wyatt had about 200 bushels of corn, 30 loads of feed and a considerable number of farm tools, harness, etc. in the barn all of which were lost.

Mr. Wyatt was awakened at twelve o'clock by a bright light that he at first thought to be made by an automobile. He arose and went to the door and at once saw his barn was in flames. He rushed to the scene in his night clothes and succeeded in saving the property above mentioned.

He came to Crossville early Monday morning and at once telephoned for Perry Phipps, Chattanooga, and his bloodhounds. Mr. Phipps and his hounds arrived on the afternoon train and went at once to the Wyatt home. The dogs took the trail readily and went at once to the home of Annis Myers, who lives a mile and a half from the Wyatt home. It is alleged that tracks of the guilty party were plainly visible, that the tracks were measured and fit the size and shape of the shoes worn by Myers. Myers was not arrested Monday, but it is probable he will be by the time or before this reaches our readers.

It seems there has been trouble between Wyatt and Myers and this is regarded as the outcome. Myers was considered a good citizen and the evidence against him is a great surprise to his friends.

The loss to Mr. Wyatt is very heavy and is estimated at \$2,000. It represents his work for the summer on his farm aside from the loss of the barn, which is claimed could not be built for less than \$500. Mr. Wyatt lost his wife a year or so ago and has several small children which makes it very difficult for him to get away from home to work. He is an industrious and energetic citizen. He was very active in the interest of Red Cross work during the war and also lent his best energies to every character of work that ten-

ded to support the war. His loss is deeply regretted by his many friends over the county.

BODY FROM OVER SEAS

Remains of Pvt. Thomas Bruce Interred at Burke Sunday

The body of Thomas Bruce arrived from France Saturday afternoon accompanied by a soldier. The body was taken to the home of his father, J. E. Bruce, on Webb Avenue, where preliminary funeral services were conducted by Revs. C. F. Starns and A. C. Koser, Judge C. E. Snodgrass and J. W. Dorton. Sunday morning the remains were conveyed to Sequatchie valley where the last sad rites were said and the remains tenderly laid to rest in the Wilson cemetery, near Burke.

The remains were accompanied from Crossville by the family and several friends. The services were concluded by J. W. Dorton and G. W. Davenport.

Thomas Bruce enlisted in the service July 27, 1918, went to Camp Gordon for training, sailed for France September 10, 1918, and died in a French Hospital October 12, 1918.

CARD OF THANKS

We take this method of expressing our gratitude to our friends at Crossville and Burke for the kindness shown us during the arrival and burial of our dear son and brother. Mr. and Mrs. J. E. Bruce and family.

Mr. and Mrs. E. L. Lemert left Tuesday of last week for California to pass the winter with their son, Nathan Lemert, who lives near Los Angeles. They will visit their son, B. D. Lemert, in Missouri, and other children in Oklahoma City and in Colorado enroute. They go to California with the purpose of making their future home there but their many friends here cling to the hope that they will finally return here to remain. They are most excellent people and it is with much regret that our people see them go away.

ESTRAYED—One light bay year-old-past horse colt, star in forehead and right hind foot white. Five dollars reward for its return to my home. J. H. Barnard, Peavine. 11-3-21

HOTEL MOURFIELD

Rockwood Tennessee

Electric Lighted

Reasonable Rates

Good Meals

Steam Heated

FRED ROBLIN, Prop.

Tax Assessor, Thos. J. Kerley, was up from Winesap Saturday.

Rev. J. B. Cobble was in from Biglick Saturday.

Gaither Adams, son of J. R. Adams, and Kim Todd and wife returned yesterday morning from Idaho, where they have been for a year. They say the weather has been cold there for some time and snow has fallen.

FOR SALE—1000 acres of what is known as the Wiltland, lying near Pomona. I have recently purchased this property with the purpose of cutting it up into small farms. If you are interested see me. J. W. Buttram. 11-3-21.

W. G. Adsmund was up from Cookeville Sunday shaking hands with his friends. Mr. Adsmund was county agent for this county and rendered splendid service. He is now holding the same position in Putnam county and is giving good satisfaction.

Clarence Loshbough arrived from St. Joseph, Michigan, a few days ago for a visit of some weeks with home folks. He has been traveling salesman for an automobile axle concern.

FOR SALE—300 acre farm at Pomona. Good land, good timber, good improvements. Priced right. Call and look it over. Harry Hoffner. 11-3-21

The Art Circle will meet with Mrs. Lelah DeGolia Friday, November 12.

The Cumberland County Retail Credit Mens' Association held a banquet at Payne's Inn Monday night. Twenty plates were laid. W. F. Smith, secretary and treasurer of the Roane county Association was the guest of the evening. A very pleasant and interesting time was had as every member was present.

J. R. Adams has purchased the livery stable from Clay Sells and will keep grain and other feed in connection with the livery business. He will also have a storage place for trucks and cars. The purchase price was \$2,000.

The handle mill that has been in operation for some months near the John Turner home, has ceased work and the machinery has been hauled to town for shipment back to Nashville.

FOR SALE—Aristocrat Barred Rock Cockerels. Large bone, well marked. March and April hatched. \$3.50, \$5.00 and \$7.50. O. B. Rector Crossville, Tenn.

TEACHERS, TAKE NOTICE

An examination of applicants for Teacher's certificate will be held on Friday and Saturday, December 3, and 4, 1920. All applicants who desire to take this examination must be at my office by nine o'clock A. M. on each day of the examination. A. J. Albertson, Co. Supt.

SAVED HIS HORSE

Mr. R. L. McIntire, of Altoona, Ala. says, "Dr. LeGear's Antiseptic Healing Powder quickly healed some bad wire cuts on my horse. I defy any stranger to find the slightest scar on him."

Dr. LeGear's Advise and Remedy saved this valuable animal. He warns them not to leave a wound sore or cut exposed, but to dust on Dr. LeGear's Antiseptic Healing Powder, which instantly forms an antiseptic protection and promotes healthy healing.

In his 28 years of Veterinary Practice and Expert Poultry Breeding, Dr. LeGear has compounded a remedy for every curable ailment of stock and poultry. Whenever they require a remedy, it will pay you, as it did Mr. McIntire, to purchase from your dealer the proper Dr. LeGear remedy, on a satisfaction or money back guarantee. adv

TEACHERS MEETING

Following is the program for the Teacher's Association to be held in the High School building, Crossville, Friday and Saturday, November 19 and 20.

FRIDAY EVENING

Music

Invocation, Rev. A. C. Koser.

Music

Address, G. W. Davenport

SATURDAY 9.30 a. m.

Song

Devotional Exercise, Rev. R. E. Newton

Song

Teacher's Training, round table discussion led by Mrs. Carrie Murphy.

Discussion by Association of Text Book Chapter 4, 5, and 6, led by Prof. Frank March.

Drawing in Public Schools, by Miss Elizabeth Fletcher.

It is the duty of all teachers in the county to attend these meetings.

A. J. ALBERTSON, County Supt.

DISOLUTION NOTICE

Notice is hereby given that G. E. Harrison has sold his interest in the Harrison Motor Company to Cosby and George Harrison. Nov. 9, 1920. G. E. Harrison.

SHY ON LOVE NESTS

Last year there were 1,000,000 weddings in the United States and only 70,000 new homes were erected. Those figures give one an acute realization of the housing problem. Congress is certain to attempt its solution when it assembles again, in preparation for which Senator Calder of New York has been gathering statistics and other information during the summer months.

Lived Days in Sealed Box.

Joseph Barcroft, a reader of physiology at King's college, England, has lived for six days in a hermetically sealed glass box. The experiment arose out of a 30-year-old controversy as to whether it is possible to calculate the amount of oxygen in the blood from a knowledge of the amount of oxygen in the breath. The test was also made to demonstrate whether it was necessary that airmen should have oxygen apparatus when flying at great heights. It proved that oxygen was necessary to flying men, but it did not show to what height they could fly with safety. While in the box Barcroft kept a record of his sensations and made scientific observations. He said he suffered from sleeplessness, but otherwise did not experience much inconvenience except on the last day, when the atmosphere became extremely rarefied. He then had headaches and nausea.

Sunflowers Fall as Silage.

After all, the common wild sunflower of Kansas is just a useless weed, and attempts by scientists to make it anything else so far have failed.

Last fall ten tons of wild sunflowers were put into a silo between layers of corn silage by the dairy department of the Kansas State Agricultural college. A feeding test was arranged early in the winter. Five cows were fed wild sunflower silage, alfalfa hay and a grain mixture consisting of four parts corn chop, two parts bran and one part oil meal. Previous to the beginning of the feeding test the cows had received corn silage in addition to the hay and grain.

When changed to the sunflower silage they ate sparingly of it and failed to become accustomed to it. The cows decreased in milk production and lost body weight. The average loss of body weight was 60 pounds per head for the 24 days the test was conducted. Each had decreased 3.4 pounds in daily production of milk by the end of the period.

They were then changed to cane silage and in 24 days gained 25 pounds per head and all but one increased in milk production.

Orders by Pigeon-Post.

An entirely practical use of homing pigeons is reported from England. The inventor of the system is a butcher's son, who employs his birds regularly to carry orders from outlying districts—presumably where there are no telephones—to his father's shop. The plan works excellently.

When the boy goes to collect orders he takes six of his fastest birds in a trap with him. After he has gone a mile or two and collected a dozen orders he liberates a pigeon with the slips inclosed in a little metal cage attached to the bird's foot. Before five minutes have elapsed these orders are in the shop.

At the various stages of his round, which usually takes three hours, the other birds with more orders are set free, and by the time the shop is reached all the orders received by this pigeon post have been dispatched.

SAVE SEED CORN NOW

That Is The Best Way to Control Threatening Diseases

Corn is the most important field crop in the United States. It is the big crop in Tennessee. This great crop is threatened by serious diseases known as rot of roots, stalks and ears. All of the different kinds of corn have been found susceptible to these diseases and the most careful estimates possible indicate that they are causing a greater loss in this country than any others affecting corn.

According to J. C. McAmis, specialist in agronomy of the Division of Extension University of Tennessee, this disease is widely prevalent in Tennessee this year. This makes it very important that farmers take steps at once to control its spread and Mr. McAmis states that the best method is by careful selection of seed corn. The actual losses caused by these diseases cannot be accurately estimated. If it were possible to determine losses caused by poor stands resulting from planting infected seed and also the losses due to stunting of the growth of the many remaining plants, with the consequent reduced size of ears, it is believed that the total loss would be fully 10 per cent and perhaps more. They are caused by several organisms and probably by some other contributing factors.

Selection of well-matured seed at the proper time from healthy plants seems to be the best method of control. Diseased ears or even apparently healthy ears from diseased stalks should not be selected for seed. Field selection of seed corn before the first killing frost is one of the best methods of selecting disease-free seed but it is now too late for this in most sections. However, in all events these diseases must be controlled if possible and for this reason farmers are urged to be unusually careful in selecting seed for next year's crop. They should select about five times as many ears as will be needed, to allow for discarding later all ears found to be diseased. Cure and store seed ears in a dry, well ventilated place. Full directions are given in Farmer's Bulletin No. 1175 which may be secured free upon application to the Division of Extension, University of Tennessee, or the county agent who will gladly secure it for you.

After the seed ears are thoroughly dry, discard all ears with denting that is too rough or with pink, discolored, cracked, or shredded shank attachments, or with moldy, discolored, or starchy kernels. Make a special germination test of ten representative kernels from each seed ear selected and keep for seed only those ears represented by ten healthy seedlings, cutting open the ten kernels to make sure they are not rotted, even if the sprout appears to be healthy. Discard butt and tip kernel and shell each ear separately by hand.

Write to the division of Extension for farmers Bulletin No. 1176, "Control of the Root, Stalk and Ear Rot Diseases of Corn," or ask your county agent to get it for you.

AT THE MECCA

The serial now running at the Mecca theatre every Thursday night, "The Adventures of Ruth," made a remarkable hit on its first night, last Thursday. The interest displayed by the audience shows it to be an especially strong serial and is fully up to the best of the kind in the country. The admission charge is very light, only 15 and 25 cents, as Mr. Hendly is using it largely, as an advertising feature for his show. Besides the regular serial Thursday night, there will be the regular Saturday night high class show.

FOR SALE—I have one pure blood Jersey cow, six years old, and one half blood Jersey cow, three years old, with four months old calf. Worth the money I ask. C. G. Black. 11-3-21.
